SUMMARY

I am a passionate full-stack developer with hands-on experience in building enterprise-grade applications using React.js, Spring Boot, and microservices. I've also developed lightweight GenAI applications using Flask and worked extensively with MySQL for backend integration and data management. My strengths include API development, frontend design, and delivering scalable, secure solutions that address real-world challenges.

EDUCATION

Anil Neerukonda Institute of Technology and Sciences

Bachelor of Technology in Information Technology. CGPA: 8.80

Vishakapatnam, AP

December 2021 – April 2025

Sri Chaitanya Junior College

Class XII - State Board of Andhra Pradesh. Score: 934/1000

Vishakapatnam, AP

April 2019 – March 2021

Bhashyam Public School

Class X - State Board of Andhra Pradesh. GPA: 9.8

Srikakulam, AP

June 2018 – March 2019

TECHNICAL SKILLS

Programming Languages: Java, HTML, CSS, JavaScript, MySQL, Python

Libraries and Frameworks: React, Spring Framework, Spring Boot, Spring MVC, Spring Security, Flask

Tools and Platforms: GitHub, Postman, IntelliJ IDEA, Eclipse, VS Code, Gemini API

Concepts: Database Management System, Data Structures, Operating System, Computer Networks

PROFESSIONAL EXPERIENCE

Programmer Analyst Trainee

Cognizant Technology Solutions

Hyderabad

June 2025 - August 2025

- Gained hands-on experience in backend development using Java and Spring Boot.
- Implemented API integration and managed SQL databases for data-driven applications.
- Enhanced understanding of secure authentication mechanisms and Agile development practices.
- Used GitHub for version control and collaborative development workflows.
- Strengthened problem-solving and teamwork skills in a professional environment.

Programmer Analyst Trainee

Cognizant Technology Solutions

Chennai

September 2025 - Present

- Working full-time on the U.S. Ba-ACAPS Core (Feb 2024) project, focused on developing and maintaining a secure, scalable enterprise application.
- Utilized Java, Spring Boot, Spring MVC, Spring Security, and Spring Data JPA with MySQL integration.
- Built robust backend services with authentication and authorization to manage sensitive data effectively.
- Delivered core functionalities aligned with business and regulatory requirements.
- Collaborated closely with cross-functional teams to ensure high-quality software solutions.

PROJECTS

• SmartBank Assistant

- The system provides secure user login and account creation, allowing users to manage their personal bank account.
- Users can deposit money, and every transaction is automatically recorded and displayed in a transaction history.
- The application includes an AI-powered banking chatbot that can answer banking-related queries and provide account balance or transaction summaries.
- The chatbot can summarize long text inputs, extract key information from uploaded PDF documents, and analyze cheque images to identify details like sender and receiver.
- The project is developed using React for the frontend, Flask for the backend, and MySQL as the database.

- **Bank Locker Management Application**

- Developed a secure web application for managing bank locker requests and allocations.
- Implemented user authentication to allow customers to request lockers of different sizes (Small, Medium, Large).
- Enabled users to track their locker request status (Pending / Approved / Rejected) through a dedicated dashboard.
- Provided an admin panel to review, approve, or reject locker requests based on availability.
- Implemented an automated rule where pending requests are auto-rejected if not processed within 3 days.
- Added locker validity tracking with renewal options for continued access before the expiry date.
- The application is built using Spring Boot for the backend and MySQL as the database.

- **Insurance Policy Management System**

- Developed a secure and efficient web application using Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, and MySQL.
- Implemented authentication and authorization for role-based access control.
- Integrated MySQL database to manage insurance policies, customers, and premiums.
- Designed a user-friendly interface for seamless interaction and data management.
- Demonstrated expertise in building scalable, secure, and maintainable enterprise applications.

- **Online Shopping Cart**

- Developed an Online Shopping Cart website using React.js for the front end, Node.js and Express.js for the back end, and MongoDB as the database.
- Implemented user authentication for secure access and personalized shopping.
- Built product management features including add, update, and delete operations.
- Delivered a seamless shopping experience with dynamic UI and efficient backend integration.

CERTIFICATIONS

- 2-Day Competitive Programming WorkShop In GDSC.
- NPTEL Data Structures Using Python.
- NPTEL Data Structures Using Java.
- Participated in a 4-Day WorkShop and 24 Hour Hackathon on Amazon Web Services.

ACHIEVEMENTS

- Achieved 200 Days Badge 2024 in Leetcode.
- Accomplished problem solver with a track record of successfully tracking over 450+ leetcode challenges.
